\*CSPI bases its policy suggestions on the premise that people cannot make good decisions about to eat and drink without government intervention in the form of bans, taxes, lawsuits, and restrictions.

*Caution: CSPI contains traces of nuts.*

## WARNING!

Special interest with radical anti-choice agenda. Take recommendations with a grain of salt (just one, of course).  
Caution: Use of CSPI information may result in loss of common sense.

The misnamed Center for Science in the Public Interest has issued hysterical warnings about everything from soup to nuts. Now they're calling for warning labels on soft drinks. The last time CSPI released a report on soda they had to admit their exaggerated figures were twice as high as they should have been.

The next thing you know, they'll be shouting about the evils of movie popcorn ...  
Oh, wait. They've already done that.
