

“Even if animal research resulted in a cure for AIDS, we’d be against it.”

—Ingrid Newkirk, president of People for the Ethical Treatment of Animals (PETA), in *Vogue* magazine

Hard to Believe?

Animal rights groups like PETA and the misnamed Physicians Committee for Responsible Medicine (PCRM) are demanding an end to all medical research that uses animals. This research has brought us practically every major medical breakthrough that we take for granted—including *insulin and chemotherapy, which PETA and PCRM spokeswomen depend on for their own survival!*

PETA and PCRM care about lab rats more than sick people. They promote boycotts against the American Cancer Society, the March of Dimes, the American Red Cross, and dozens of other indispensable health charities.

Hard to Believe. But True.
